

IntegerHealth

Quantifying Healthcare Outcomes

***Know the value of care
Not just the cost***

The Problem

Healthcare is too expensive. Why? Because we focus on what doctors and hospitals do – the process – instead of the results that they get – the outcomes.

IntegerHealth changes that.

Breakthrough: Outcome Analytics

Only IntegerHealth quantifies healthcare outcomes – merging cost and quality in a single actionable dollar value.

Developed by a former neurosurgeon, our patented platforms cut through the noise of clinical guidelines, evidence-based medicine, HEDIS and CAHPS to answer the real questions:

- Did the patient get better?
- How much did it cost?
- How long did it take?

***While others measure the process –
what a doctor did, or did not do –***

For insurers (including ASOs & TPAs), health systems & self-insured employers

we show you what worked.

Why It Matters

- ✓ **Drives** down costs and improves quality of care across:
 - Health plans
 - Wellness programs
 - Workers' compensation
- ✓ **Optimizes** provider networks and referral patterns
- ✓ **Strengthens** negotiations among payers, providers and vendors
- ✓ **Translates** complex health data into strategic decisions

Our Patented Platforms

 **Claims + Absence Costs** – Measures the full cost of care: medical claims + time away from work

 **Claims per Healthy Day** – Calculates the daily cost to keep a patient healthy

 **Wellness Program ROI Calculator** – What you spent versus what you saved

 **Tree Frog Navigation System** – Visual intuitive dashboards to find insights fast
